

Anti-idling— It's The Law

Anti-idling is a quality of life issue intended to protect our community from harmful auto fumes to the greatest extent possible.

Facts

- For every gallon of gasoline used the average car produces 20 lbs. of (CO₂). We can reduce this by eliminating wasteful vehicle idling.
- Warming up your car is no longer beneficial since fuel injectors have replaced carburetors. 30 seconds is all you need.
- Idling 10 minutes uses as much fuel to drive five miles.
- Reducing excessive idling will reduce wear and tear on your vehicle.
- Reduces unnecessary air pollution.
- Saves YOU money.
- Anti-Idling is the law. Idling over 3 minutes is selfish and illegal.
- Minimum penalty amount for violation of C. 39:3-70.2 is \$250.00.
- The two main areas of excessive idling in Keyport are around our schools and at our waterfront.
- Idling can be enforced on public roadways and on private property.
- You can make a difference. Please don't idle your vehicle.
